Subject: RE: KFM Wells

List of EHU wells connected to KFM. I believe all can flow to either KFM or Mustang, depending on how the valves are opened/closed.

EHU 15/17 SLS

Subject: RE: KFM Wells

I've not heard of the 86%, but I think 98% of the EHU WI ownership is OEA and OEA's interest is dedicated to KFM. I don't know if it matters or not, but the Walrus wells in section 36-15N-6W are split dedicated and split connected to KFM and Markwest. KFM receives 73% of the volume and MW gets 27%.

Team – Do we have a list of the EHU wells and what pipeline is connected? I think in most cases, the EHU wells can flow to KFM and/or Mustang.

Subject: RE: KFM Wells

I am being told that there is an agreement to have 86% of EHU volume go to KFM and the remaining to another party? Can someone confirm this?

Neil, if this is the case we will need to start breaking out EHU volumes vs OEA so that we can only account for the proportion that would go to KFM.

Subject: RE: KFM Wells

It sounds like this piece of the process is working and the missing link for March are the EHU wells into KFM. I think we would need to go through the well list for January and February to reconcile for the revenue differences in those two months.

Subject: RE: KFM Wells

Thank you. In my current process I check KFM against what Jerry sends each month for gas actuals. I use the attachment and filter column O "Gas Sales KFM" to everything that is not 0. I currently have all 268 wells accounted for on the attachment.

However, EHU is not included in that attachment. In the 4.22.2019 KFM Wells attachment I Have a list of well. The wells with "Y" agree with what has gas sales. The wells with N/A are not on the list. There are 47 of these wells.... 32 are EHU, 8 are new PDPs wells so they may not be included in the gas actuals for March, and 7 are older wells that may have had 0 gas sold for March.

Subject: FW: KFM Wells

Neil/Kaitlyn – I think this can be solved for by syncing Kaitlyn and Jerry up. I think Jerry is the right point person for the source of this information. He has the information and Kaitlyn just needs access to retrieve it.

Team,

Attached is the list of wells Kaitlyn is using in her OEA volume forecast for KFM. Please let me know if you see any wells that need to be added or removed.

Best,
Neil
